***Examiner's Comments***

**IN CLAIM 1**

Line3-4; replace "an means" with -- a means--.

***Reason for Allowance***

The following is an examiner's statement of reasons for allowance: the prior art of record (US Pat. 4,716,309) fails to teach or fairly suggest an output driver circuit device connected to an output pad of an integrated circuit having a predetermined power supply voltage nominal level, the device comprising: a MOSFET first stage and an means for outputting an output signal state; and a BiCMOSFET second stage including means for automatically maintaining the output signal at the output signal state when said power supply voltage nominal level is less than a threshold voltage required for the MOSFET first stage to maintain the output signal state or to keep the BiCMOSFET means inactive when the power supply voltage is within the power supply operating range as called for in claims 1 and 15; an auxiliary output signal driver device for a CMOS output driver circuit for an output pad of an integrated circuit comprising: a series of bipolar transistors coupled to said output pad, an output node from, said, a predetermined bias resistor for determining current flow, a MOS transistor for shunting a current that passes through said bias resistor, such that when said power supply voltage is substantially within said operating range the MOS transistor prevents the current from driving a base of a first bipolar transistor of said series, and when said power supply is below said operating range the MOS transistor is not shunting the current that passes through said bias resistor and the current is thereby driving the base of the first bipolar transistor of said series as called for in claim 11. Therefore, claims 1-15 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
